ahros one warrior chronicle. ahros one warrior chronicle vr

We got dragons, we got guns, we got robots and we got mutants. Where could this go wrong?

The content itself is really nice. And the general concept as well. Weapons look and handle nicely, the usage of those is easy to understand. We do get a tutorial, simulations, all nice and dandy. The one big downside here is the manual controls. Using the trackpads of vive controllers really takes a big chunk out of the fun. Moving and controlling turrets with those is incredibly clunky and frustrating. Another minor thing would be that you have to hold two-handed weapons to your right - not so cool for lefties, but hey, not all that bad.

All in all I'd recommend the game, it has great potential, and it feels very versatile. You get a lot of different things to play with, it's open world-ish and is still expanding. Needs to be tweaked in some ways, but definitely something manageable.

Show-off potential when introducing people to VR for sure.. This game has potential but has many many issues. The movement is terrible and there is no blink system that I could find. The combat has potential but the movement and handling are so awful especially on foot that the immersion is constantly being broken. I found myself dying unwarrantedly over and over and doing the same this monotonously. However, with the right fixes this game could be very very good but as it stands now it is, for the most part, unplayable if you are looking for enjoyment and in its current state it is not something that I would want to play. I sincerely hope they fixed it because I feel like I just threw my money away. :( If it is worked on and fixed I would give it a thumbs up.. holy sheeet! BAD♥♥♥♥♥GAME.... motion sick like crazy.. barffffff. NEED TO FIX THAT SOMEHOW. This

The

Scoop

It's a fun game and has some nice features! It's early access so yeah there is that. Give it a try!

Sadly there are too many things wrong with it to list them. Here's our first and LAST episode of a series about this game until it has some major fixes done.

<https://www.youtube.com/watch?v=ZzE0lqZCWUA>. Very promising game. Awesome opening scene when you are in a spaceship approaching a planet. Really gives an excellent sense of place and presence. Really great art style in this game. I love the diversity of activities, from fps fights in dungeons to riding on a dragon, really super fun, even if the controls are a little janky at this point. This game is early access, so there's still plenty of work to be done. y-axis needs an inversion option, for example, both for shooting turrets and for flying dragon. Really promising, and I love games like this that go far beyond wave shooters. This is a slice of a much deeper game, I'm happy to support and recommend it.. I like the game Drunk or Dead. So I naturally wanted to like this game from the same dev. Unfortunately, this game is a hot mess. It feels very disjointed. I was confused on what I was supposed to be doing. Everything felt unpolished. You can't even turn (you have to physically turn) and just weird things like using the same model asset from Drunk or Dead. Sounds repeat themselves over and over.

So I finished the Turret part where you destroy some flying games. Then I got to this teleport area. And the game crashed. So I restarted the game, clicked on story mode. Clicked on continue game. I got to the same teleport as last time, and the game crashed again. Well, that was the end of my game.

I definitely say DO NOT BUY THIS GAME. It's buggy and just bad overall. It's not worth any money.

Rating 3/10 ... Sad to give this score because I actually like Drunk or Dead VR. Only played it a little so far, but it's a lot of fun :D

Artificial locomotion system takes few minutes to get used to, but I find it more immersive than teleport, and a dragon flight is just awesome :D

There are a lot of items that can be interacted with, and physics is working well. I liked a basketball minigame. ^\_\_^  
I hope devs will add more storyline, more dungeons with monsters and more guns.

Not sure why this is getting "mostly positive"... feels like a forced, disjointed effort to incorporate basic VR shooter elements.. I'd like to start by saying that this game has real potential.

Sadly there are too many things wrong with it to list them. Here's our first and LAST episode of a series about this game until it has some major fixes done.

<https://www.youtube.com/watch?v=ZzE0lqZCWUA>. This early access game hasn't been updated in a while and may be abandoned.. The concept is an imaginative mix of sci-fi and dragons, but it seems like the devs just threw a bunch of ideas at the wall and nothing really stuck. The controls are servicable and the graphics are decent, if a little unpolished. Ultimately, I just wasn't able to find anything enjoyable in here.. game was ok untill you start flying around on a dragon really stupid mechanics. Good formula for the mix clever game ideas. It's like a breath of fresh air for VR-games.. I really love the concept. Dragons and sci-fi are cool.

Dragon is adorable and I want to pet it, but I can fly it only on lite mod cause extreme mod makes me sick((

Big gun is outstanding! I like how it feels.

Pros:

- Nice dragon

- Big gun

- Cool concept

Cons:

- It' early access, but I want more content
