one of the finest platformers made in 92 had its still better than most indie platformers made to day.. If you like point & click adventure games you will enjoy this.. I think this is the best game ive ever played ive played it ever since i was 4 years old and now 11 years later it still will forever hold a special place in my heart. not bad really - deffo value for money though.. If you don't have high expectations on a Megaman game this might be for you. It's not a bad game, but it also isn't a good one in my oppinion. I requested a refund.. great DLC, specially the conclusion to freeze's story. You know your game is bad when most of your options don't work.

Edit:

It looks like the devs are downrating all the negitive reviews.. A bit buggy but works fine with V-Sync on. Great feeling and no need to play the ♥♥♥♥♥♥ fourth movie.. Wonderful game.

Teaches you a bit about economics, politcs and trading in general. Not to mention geography and history. I had the opportunity of visiting Lubek after finishing the campaing in P3 and P4 and I was all like "F*** yeah, I used to mayor this city"

Also, unless you play fair, the game is most likely going to hurt you (being an arsonist/pirate can be tricky to handle and can backfire easily)

Fun, fast, strategic arcade shooter that is incredible in solo or where it really shines, 4 player multi!!!. This is really fun. Was surprised there was no music, but that is easy to fix by turning on pandora.

I would love to see other particle options. Picking colors would be cool.

If this was developed more I would pay money in a heartbeat. Thanks for a great free demo!. Great costume for Tamamo lovers, which resembles her looks of lancer class version in FateVGrand Order.. It's just meh.. **BEST GAME EVER!!!!!!!!!!!!!!!!!!!!!!!!!!!! NEEDS MORE PEOPLE DO!!!!!!!!!!!!!!!!!!!!!!!!!!!!**
